Where Guests Become Family

---

---

# **Problem Statement / Basic Details of the Team**

## **Problem Statement:**

Design an immersive hospitality platform that seamlessly blends the warmth of Indian culture with modern convenience, allowing guests to experience 'Atithi Devo Bhava'—where every stay feels like a divine encounter

**Theme:** Tourism and Culture

**Team Name:** Sourcerer's Source Code

**Member-1:** Shubham Jha (Team Leader)

**Member-2:** Shivam Sinha

**Member-3:** Satyam Kumar

**Member-4:** Kirti

---

# Features/Functionalities

---

## Basic Features:

- **Property Search:** Users can search for available properties based on location, dates, and filters.
- **Property Details:** Detailed information about each property is provided, including photos, amenities, and pricing.
- **Booking Management:** Users can book properties by selecting dates and confirming reservations.
- **User Authentication:** The application supports user registration, login, and profile management and background Verification through Government Identities.
- **Host Features:** Property owners can list their accommodations and manage bookings. Verify themselves with their Government Identities.

# Ideas and Solution

---

## Extraordinary/Unique Attributes:

- **Communal Living:** Providing an option to the guest to also book places where they can accommodate with the Host and their family in the Communal Living
- **Local Cultural Experiences:** Integrate a section that highlights local cultural experiences. It Showcase nearby cultural events, festivals, and traditions.
- **Customized Cultural Itineraries:** Collect information about guest's interests (e.g., history, art, spirituality). Create personalized itineraries that include offbeat attractions according to their preferences.

# Technology Stack

---

- 1. HTML (HyperText Markup Language):** HTML is the backbone of any webpage. It's used to create and structure sections, paragraphs, headings, links, and block elements on a web page.
- 2. CSS (Cascading Style Sheets):** Purpose: CSS is used to control the presentation, formatting, and layout of a webpage. It allows us and developers to create visually engaging webpages, alter the colors, fonts, and spacing, divide it into multiple columns
- 3. JavaScript:** Purpose: JavaScript is a scripting language that enabled us to create dynamically updating content, control multimedia, animate images, and pretty much everything else.
